## M-16612-AECJ 2018 Cobra Jet Carbon Fiber Hood Installation

### Hood

PLEASE READ ALL OF THE FOLLOWING INSTRUCTIONS CAREFULLY PRIOR TO INSTALLATION. AT ANY TIME YOU DO NOT UNDERSTAND THE INSTRUCTIONS, PLEASE CALL THE ANDERSON COMPOSITES CUSTOMER SERVICE LINE AT 1- 877-624-2662 (9:00 AM – 5:30 PM CALIFORNIA TIME, MON-FRI)

Not to be installed on vehicles that are driven on public roads. Windshield wiper assemblies must be removed. Hood does not accommodate windshield washer hoses or nozzles. Carbon fiber hoods require the use of heat shields to reduce damage to the hood surface and composite construction.

### Installation

**NOTE:** An assistant is necessary for the installation of the hood.

1. Lift hood hinges in the upward position.
2. Lift the hood onto the hinges and install mounting nuts. (4x)
3. Do not fully tighten nuts.
4. Do not install or re-install hood struts, carbon fiber hood may bow just forward of the strut mounting point or crack from stress, only use OEM prop rod, (JR3Z-16826-A)

E261217

### Hood

5. Carefully close the hood.

E261218

6. Align the hood to spec

E261219
